I have to confess. I am an optimist. We have been through a lot over the past year. Some things, of course, are very painful. But some things were encouraging and positive. The words that come to mind for me are empathy, creativity, and resilience. And anticipation. Anticipation that there is light at the end of the tunnel things will continue to improve for everyone. A shout out to Yogis Café by the way. They are open for indoor seating and serve great drinks and food items. Check them out. Yogis is owned by a Stillwater homeowner, so if you like coffee, tea and other things, it is a great place to go. It is a short walk from Stillwater, too!

March will be one of our busiest months as we make preparations for the pool opening, complete spring cleaning and necessary repairs to the clubhouse and other assets. The RealManage team is lining up all our subcontractors to perform their work. The weather finally is looking better so we will be able to get going on these repair activities.

The City of Naperville is providing funds to repair mailboxes that were damaged by the snow plows. You can find information on this process at https://www.naperville.il.us/services/snow-and-ice-removal/mailboxes/.com.

One more note about repairs. A special shout out to Marcia Caruso for acting swiftly to replace one of our clubhouse furnaces that went out during the brutal cold weather. This furnace heated an exterior wall so we avoided frozen pipes and the damage that could have caused.

The 87th Austrian Pine Tree Removal project is completed! I am looking forward to seeing how the maples respond to their new surroundings. In my opinion, it is one of the most successful projects the Stillwater HOA has ever delivered.

Remember to vote on April 6th for a number of city wide positions (City Council, School Board, etc.)

Finally, there will are four HOA Board positions open this year. There will be more information coming out shortly.

As always, thank you for the faith and trust you put in the board to serve you.
Plan your vegetable or herb garden now by choosing the site and knowing what your family likes to eat. Will you use patio containers, space in the backyard, or a rented garden plot?

Mixing in brightly colored peppers or variegated herbs is pleasing to sight and taste while attracting much needed pollinators. Plant family favorites and try a few new varieties.

Spring tends to be wet so give ground soil a squeeze to see if it can be worked. If soil sticks together, it’s still too wet to dig and plant. If it crumbles, dig in, adding organic matter for nutrients and to help break up compaction.

Plants need oxygen in the soil. Avoid planting vegetables where water puddles on the ground for days. Most vegetables can be grown in containers with adequate drainage holes. Espoma Garden-tone or Espoma Tomato-tone is great for fertilizing. Follow the label instructions for use.

If planting seeds, pick quick growing vegetables and continue successive crops through the season. Seeds are fun to watch sprout and a great lesson for children when they participate in the process.

If choosing plants, you’ll have a head start on longer season vegetables. Adding colorful and fragrant flowers to your garden will draw the pollinators and provide you with a better harvest. Marigolds and Nasturtiums are known to repel pests. Most herbs are deer and rabbit resistant and make lovely, edible additions.

Vegetables grow best in an area close to a water source that gets at least 6-8 hours of sun. Start small with room to grow. When the soil has warmed up, layer on 3”-4” of organic mulch, such as weed free straw, to keep down weeds and maintain soil moisture.

Plant tall plants at the northern end of your garden so they do not shade shorter plants. Grow vining plants on trellises to save space.

Succession planting of another crop once you have harvested a crop maximizes your garden’s yield. One way to achieve this is by planting the same crops over every two to three weeks, such as short rows of lettuce, radishes, spinach, beets, carrots, and bush beans.

Basil and tomatoes are great companion plants in the garden as well as in a sauce. Peppers, spinach, tomatoes, and basil grow well together. Corn and beans grow well together because the corn stalk acts as the bean vine’s trellis. Rosemary repels bean beetles.

Broccoli, cabbage, Brussels sprouts, cucumbers, peas, potatoes, and radishes all grow well near each other. Carrots and onions can be planted with beets, lettuce, tomatoes, marjoram and savory.

The average last frost date for our area is May 15. Peas, lettuce, spinach, cabbage, broccoli, cauliflower, parsley, and onion sets can be planted 4 weeks before the last frost. Radish, beets, carrots, and Swiss chard can be planted 3 weeks before the last frost. Summer squash and beans can be planted right after the last frost, while cucumbers and potatoes can go in a week after that.

Two weeks after the last frost, plant your peppers, eggplant, melons, tomatoes, and winter squash. Melons need to wait to be planted a month after the last frost. It is safe to plant tomatoes in full sun after all danger of frost and when the soil temps are 60°F. Be patient, cool soil will slow growth for tomatoes.

Be sure to visit your vegetable/herb garden daily to see what is new, catch any potential problems, and harvest your crop!
“This anti-grump patch is working. I’ve only yelled ‘Get Off My Lawn’ three times today.”

By the Naperville Area Humane Society
1620 W. Diehl Road | Naperville | 630-420-8989

Thank you for supporting our homeless friends!

Bella | Female | 1 Year Old
I have what some might call “off the chart” energy. Are you an active person? Would you like to play games with me? How about helping me learn by taking me to some fun training classes? I’m really smart, and I don’t know yet how to work with all my energy, so I’ll need a family who truly is dedicated to helping me succeed. I’m friendly and fun, and I like other dogs if they can handle my play style. Kids in my new home should be at least 16 years old, and no cats, please.

Binky | Male | 1 Year Old
I’m super sweet and I welcome a good back scratch or belly rub - just on my terms. Those of you that have owned cats already “get” me. I can have what some might call a “cattitude” problem, but it’s usually short lived. My innocent eyes alone are enough to soften that blow. Don’t confuse my name with me being a “young lad”. I’m just figuring out what kinda guy I really am beyond handsome (as you can tell). Life has already re-started for me once and I’d like to think my next stop is fur-ever. On a positive note, I think I’m lookin’ good and feline even better!

Win!
2021 AIRSTREAM

$100 buys you a 1 in 2,000 chance to win a 2021 Airstream Bambi!
*Retail value $51,500.

Purchase your raffle tickets at https://www.naperhumane.org/airstream-raffle

You can purchase as many raffle tickets as you wish, subject to availability.

(Only 2,000 tickets are being sold.)
The cost of one raffle ticket is $100. Each raffle ticket grants one entry into the raffle.
The winner may elect to receive a cash prize of $30,000 in lieu of the Airstream.

The raffle is open to all persons age 18 and over who have a U.S. address.
Only the individual that purchased the ticket is eligible to win.
The potential winner of the raffle will be randomly selected on June 5, 2021 at Naperville Area Humane Society, 1620 W. Diehl Road, Naperville, IL 60563.

Winner does not need to be present to win. Good Luck!

Adoptable Pets of the Month...

Use your extra yarn & fleece to comfort homeless pets!

Comfort for Critters makes handmade blankets to comfort animals living in animal shelters. Our blankets are knit, crocheted, made with fleece, sewn, quilted and more! While these pets await adoption, the blankets provide a comfortable bed year-round. When they are adopted, their blanket goes with them, providing something familiar as they adjust to their “forever family”.

We are always interested in adding volunteers to our growing team, since we support 300+ shelters across the US! We’re also interested in receiving your “extras.” We accept donations of fleece (at least 12” in width) and yarn (full or partial skeins).

March PANDEMICS wordoku

How to solve wordoku puzzles
You only need logic and patience to solve a wordoku.
Simply make sure that each 3x3 square region has only one letter from the word Vineyards.
Similarly, each letter can only appear once in a column or row

in the larger grid. The difficulty on this puzzle is medium.
We are heading into coyote mating season, so it is advisable to be vigilant in our outlook for presence of coyotes.

In approximately 48 states in the US, coyotes are making their appearance in suburban and urban communities, including Naperville. They are a protected species in Illinois and there is little we can do except learn how to deal with this carnivorous neighbor. (Note 1)

First, before giving some how to deal with coyote suggestions from "The Humane Society of the US", a couple of points. (Read link listed at the end of this article for complete information.)

Coyote breeding season typically peaks in late February and early March. During this period, male coyotes become more aggressive and pose an enhanced threat to your dog, cat or small pet.

Coyotes are smart and can learn your habits/timing of letting your furry critters out, etc., so vary your habits and timing. It is important that you not leave food sources, open garbage, or water outside and watch your pets.

In the summer months coyote mange can be an issue – “Zombie Coyotes” – and we will have an article on this later on in the spring.

**GUIDELINES FOR DISCOURAGING NEIGHBORHOOD COYOTES**

Generally, coyotes are reclusive animals who avoid human contact. Coyotes who have adapted to urban and suburban environments, however, may realize there are few real threats and may approach people or feel safe visiting even when people are present.

Hazing

Hazing is a method that makes use of deterrents to move an animal out of an area or discourage an undesirable behavior or activity.

**Methods of Hazing**

- Yelling and waving your arms while approaching the coyote
- Noisemakers: loud voice, whistles, air horns, bells, "shaker" cans full of marbles or coins, or pots/lids/pie pans banged together
- Projectiles: sticks, small rocks, cans, tennis balls or rubber balls – don’t throw directly at Coyote!
- Other: hoses, water guns with vinegar water, spray bottles with vinegar water, pepper spray or bear repellent

- The simplest method of hazing a coyote involves being loud and large: **stand tall, wave your arms, and yell at the coyote**, until they run away.
- If a coyote has not been hazed before, they may not immediately run away when you yell at them. If this happens, you may need to increase the intensity of your hazing.

**DO-SHIELDING**

There are several tools that you can carry with you while walking your pets that can be used to repel coyotes.

- Whistle or small air horn (you can purchase small air horn "necklaces")
- Squirt guns
- Pepper spray
- Sticks or other objects to throw towards (but not at) the coyote

**IMPORTANCE TO REMEMBER**

- Never run away from a coyote!
- The coyote may not leave at first, but if you increase the intensity of your hazing, they will run away.

Don’t corner them!

- If the coyote runs away a short distance and then stops and looks at you, continue hazing until he leaves the area entirely.
- Keep a close eye on your pets and do not let them outside alone!

**KEEP YOUR PETS SAFE!**

Note 1 ‐ It appears Illinois Law allows coyotes to be hunted and trapped with proper licenses and other criteria.
Stillwater Sound

Architectural Guidelines

Some of you may already be planning for exterior home improvements. Don’t forget to submit an Architectural Improvement/Modification Application before beginning your project. Some of the projects that are subject to Architectural review include room or deck additions, a new roof or a fence. If you’re not sure if your project requires review, please check with Marcia Caruso at STILLWAT@ciramail.com.

Regardless of the time of year, it is never safe to go out on the water – even when it appears to be frozen. Ice thickness and strength are difficult to determine and can be affected by factors including pond depth, varying temperatures and aerators designed to keep water moving. Fluctuating temperatures during the freezing process can create thin spots that are unsafe for people, yet invisible to the untrained eye.

To avoid injury from falling through thin ice, please stay off the ice on all retention ponds. **PARENTS SHOULD TEACH CHILDREN ABOUT THE DANGERS OF PONDS IN WINTER AND THE IMPORTANCE OF STAYING AWAY FROM ICE.**

This winter there have been too many instances in White Eagle which our Security Patrol either observed or was called by a resident about children on the ice on the ponds in our neighborhood. Last year, a megaphone was purchased for our Security Patrol for the main purpose of communicating with people on the ice.

Most of the golf course ponds are 3’ to 6’ deep, but some of the ponds (such as the pond behind the Owners’ Club and Fawn Lake) are much deeper, greater than 15’ deep. It is extremely dangerous to walk on the ice.

Please tell your children it is not safe to play on the ice. Here is a link to an article that gives the science of freezing ice. www.wikihow.com/Know-When-Ice-is-Safe
